

PROJECT DESIGN – PHASE II

Solution Requirements, Data Flow Diagram&User Stories

Date	30 September 2026
Team ID	SWTID-2026-2859
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Functional Requirements

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Ticket Field-Based Classification	Check relevant ticket fields before assigning classification.
FR-2	Flow Designer Automation	Execute the flow and return the correct classification/routing decision.
FR-3	Category&Priority Check	Consider category, subcategory and priority values.
FR-4	Automatic Routing	Route the classified ticket to the appropriate assignment group.

Non-Functional Requirements

NFR No.	Requirement	Description
NFR-1	Usability	The ticket process should be simple and understandable.
NFR-2	Security	Only appropriate users and processes should access ticket information.
NFR-3	Reliability	Classification should consistently apply defined rules.
NFR-4	Performance	Flow should execute without noticeable delay.
NFR-5	Availability	Automation should work whenever ServiceNow is available.
NFR-6	Scalability	Solution should remain maintainable as ticket volume increases.

Data Flow Diagram – Level 0 (Text Representation)

User → ServiceNow Application → Ticket Request → Flow Designer → Ticket Field Check → Classification / Routing → Assignment Group → User

The user submits a ticket through ServiceNow. Flow Designer checks relevant ticket fields, determines classification and routes the ticket to the appropriate assignment group.

User Stories

User Type	Functional Requirement	User Story No.	User Story / Task	Acceptance Criteria	Priority	Release
ServiceNow User	Ticket Creation	USN-1	Submit a ticket with required details so it can be classified automatically.	Ticket submitted successfully.	High	Sprint-1
ServiceNow User	Automatic Classification	USN-2	Ticket should be classified based on its details.	Correct classification applied.	High	Sprint-1
ServiceNow User	Correct Routing	USN-3	Ticket should be routed to the appropriate support group.	Correct group receives ticket.	High	Sprint-1
Administrator	Flow Management	USN-4	Classification flow should be configurable and testable.	Flow is maintainable and testable.	Medium	Sprint-2
